Recieved this as a orlygift win and I am here to give my honest opinion of this game, I installed the game and set up the resolution etc then started the game, Immediately I was drawn in with the really nice dark atmosphere, the ambient sounds. Now would I buy this title at full price? well I never buy anything full price but if I had the money I would of.. This game is being sold on its puzzle solving and atmosphere. And yes it does have a good atmosphere and yes there is some puzzle solving, so of which is interesting and different from what I've seen in the past. HOWEVER, the thing not clear in the trailers etc, is the "platformer" nature of the game. What do I mean? Jumping puzzles. Timing runs through areas. And so on. I quit the game early

on because I don't like jumping and timing runs, etc. I was very aggravated when it became clear this was going to be a staple of the game. Now, all of that said, if you like timed runs and jumping puzzles then this might be something to look at. The game trades on fear, especially fear of things in the dark. It does an excellent job of it. It's got a really well put together hellscape feel and I can't say the monster I did see didn't make me jump, it did. This game is a find the next key type affair as well, so you'll be hunting through buildings and rooms looking for the next key/clue. If none of that turns you off then you will probably want to check this one out.. headache/10. Just nice game!. Doorways is a great game if you are a fan of horror.. Feels like Myth and Fallout had a baby. Not very far in. but it just seems puzzly. I was waiting to be scared out of my \*\*\*\*ing mind right off and was kinda disappointed. I hope if I play more I won't be disappointed. Nothing scares me anymore. I mostly play horror titles/watch horror movies. so I have high hopes for this.
